RESUME

I am a Systems Engineering student with over a year of experience developing web applications and data management platforms. Currently, I work as a Fullstack Developer at Tualo and collaborate on freelance projects, where I have implemented solutions that optimize processes and enhance user experience.

I have solid knowledge in key technologies, such as JavaScript, TypeScript, React, NextJs and Tailwind css. I have experience working in agile teams, solving complex problems, and adapting to dynamic environments. I am focused on creating efficient and scalable solutions that drive project success.

I am seeking new opportunities to contribute my technical expertise and continue growing professionally in challenging and innovative projects.

EXPERIENCE

[Tualo](#) – México

Fullstack Developer | *Abril 2024 – Actualidad* | *Remoto*

Startup specialized in the generation of financial reports and personalized graphs through artificial intelligence.

Responsibilities:
